The Owner's Afformations®

10 better questions for the owner who's done being the bottleneck

You've probably been told to say affirmations like "I am a great leader." Here's the problem. When you say it and don't feel it, a little voice inside says, "No, you're not."

Better questions work differently. When you ask *why*, your brain does what brains love to do. It goes looking for answers. And it finds proof. I call these empowering questions Afformations®. I discovered them in 1997, and I've been teaching them ever since.

How to use them

- Read three of them each morning, before you open email.
- Don't try to answer them. Just ask, and let your brain go looking.
- Ask the one that fits best right before you hand off a decision.
